

3. Knowledge of the need for integrated services and of the resources available;
4. A degree in a related human services field and one year of experience, or two years of experience working with the persons in the targeted population(s) for which they are employed, or an equivalent combination of training and experience.

Case managers providing ongoing monitoring and service coordination must be knowledgeable about:

1. The local service(s) delivery system(s);
2. The needs and dysfunctions of the recipient group(s);
3. The need for integrated services;
4. The resources available or needing to be developed.

The knowledge with regard to the provision of ongoing monitoring and service coordination is typically gained through at least one year of supervised experience working with the persons in the program's target group(s).

## A. TARGET GROUP

Target Group G: This target group consists of persons aged 21 or over with mental illness which is severe in degree and persistent in duration causing a substantially diminished level of functioning in the primary aspects of daily living and an inability to cope with the ordinary demands of life. These conditions may lead to an inability to maintain stable adjustment and independent functioning without long-term treatment and support, which may be of lifelong duration. The chronically mentally ill group includes persons with schizophrenia as well as a wide spectrum of psychotic and other severely disabling psychiatric diagnostic categories. This target group does not include persons with the infirmities of aging, or a primary diagnosis of mental retardation or of alcohol and/or drug dependence.
